

SANDBLAST HOSE & ACCESSORIES FOR THE SHIPBUILDING INDUSTRY

Sandblasting uses high-velocity abrasive materials to remove rust, paint, and other coatings from surfaces. It is a highly effective method of preparing surfaces for painting or other forms of treatment, but it can also be dangerous if not done properly. It is critical to choose a heavy-duty sandblast hose that can withstand the high pressures and abrasive materials involved in the sandblasting process. A heavy-duty sandblast hose will be made from high-quality materials that can withstand the wear and tear of sandblasting, and it will be designed to deliver a consistent flow of abrasive material without clogging or breaking down.

Rubberworx™ knows the heavy-duty application needs to be met with the highest quality hose product. We engineered the best abrasion resistant compounds with both two ply and four ply construction to meet the various application needs in the Shipbuilding Industry.

SANDBLAST HOSE & ACCESSORIES FOR THE SHIPBUILDING INDUSTRY

Rubberworx™ knows the heavy-duty application needs to be met with the highest quality hose product. We engineered the best abrasion resistant compounds with both two ply and four ply construction to meet the various application needs in the Shipbuilding Industry.

The correct fit of couplings and nozzles is just as important to the safety of and durability of Sandblast hose assembly. Rubberworx™ has you covered with nylon, brass and aluminum options for complete Sandblast accessories.

Don't forget deadman hose, also known as a deadman control hose, is an essential safety component in sandblasting equipment that controls the flow of abrasive material from the sandblasting machine and ensures the operator's safety. It is a fail-safe mechanism that immediately shuts off the flow of abrasive material if the operator releases the control handle or releases the hose, preventing accidents and injuries. Our industry experts can help you with a complete package of products for your sandblast applications.

SANDBLAST HOSE & ACCESSORIES READY TO GO

Rubberworx™ Sandblast

- 2 and 4 Ply Construction
- SBR Tube & Cover
- Abrasion Resistant Tube & Cover
- Kink Resistant Construction
- -40°F - 180°F
- 1/2" through 2"

Sandblast Couplings

- Nylon, Brass, & Aluminum
- Universal Crow Foot
- Threaded NPT
- Spray Nozzles

Deadman Hose & Couplings

- Dual Line Deadman Hose
- 200 PSI
- -20°F - 180°F
- 3/16" ID
- Permanent Crimp & Field Attachment Couplings

SANDBLAST HOSE & ACCESSORIES

- Best In Class Abrasion Resistant Compounds
- 2 & 4 Ply Sandblast Construction
- Bulk or Premade Assemblies
- Sandblast Couplings & Nozzles
- Deadman Hose & Couplings
